#### THE FLOWERING CRAB APPLES

MALUS (Pyrus malus) (The Flowering Crab Apples). Nothing is more striking than a Flowering Crab Apple in full bloom. Not the least of its attractiveness, however, lies in the red or yellow fruit which loads the branches in the autumn.

#### THE POPLARS

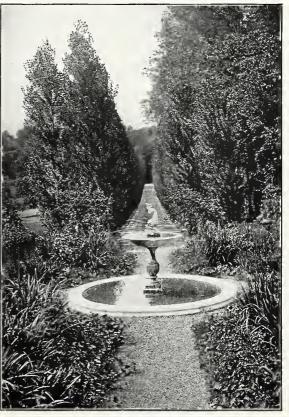

POPULUS (The Poplars). The Poplars supply us with rapid growing trees in forms suitable for street, shade and screening purposes. Probably the best known variety is the Lombardy Poplar used so much for screening unsightly objects. For this purpose it should be set from 4 to 8 feet apart, according to the density of screen required. Per alba Bolleana (White or Silver-leaved Each 100 Poplar) 8 to 10 ft. ..... \$1.50 \$15.00 10 to 12 ft. ..... 2.50 25.00 3.00 5.00 Poplar or Cottonwood) 8 to 10 ft..... 1.50 15.00 75.00 1.50 15.00

8 to 10 f	t		2.50	25 00	

#### THE WILLOWS

SALIX (The Willows). The Willows prefer a damp situation, but are often found growing luxuriantly in comparatively dry soil. They make graceful trees when allowed to develop, but are much used for screening purposes where they stand severe pruning without injury. The Laurel Leaved Willow (S. pentandra) is the most valuable plant for coarse hedge purposes. Each Doz.

THE ELMS		

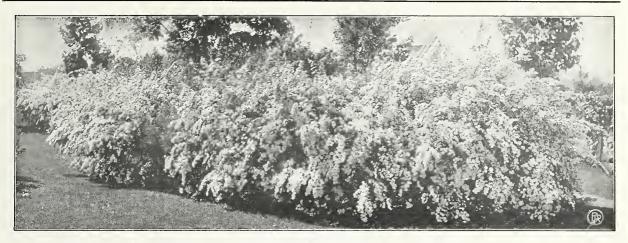

#### THE ELMS

ULMUS (The Elms). Here in New England many towns owe much of their beauty to the stately elms which border their streets. The American Elm is, of course, the best known, but the English Elm (U. Campestris) is being much used for street planting. Its foliage is somewhat smaller than that of our native variety and its habit of growth more spreading.

# FLOWERING SHRUBS

When right selections are made, the shrub border will show striking flower or foliage effects from early spring until autumn. Even in winter the shrubs are attractive from the gracefulness and color of their stems and branches.

The following list comprises sorts which have been found of value in this climate. Most varieties may be planted with equal success in either Spring or Fall. In general, for massed effects, the dwarf and small-growing shrubs should be set  $2\frac{1}{2}$  feet apart; medium and large-growing, 3 to 5 feet apart.

SHRUBS FOR SHADY PLACES: Berberis, Clethra, Cornus, Euonymus, Hamamelis, Ilex, Ligustrum, Lonicera, Rhodora, Ribes, Symphoricarpos, Viburnum.

SHRUBS BEARING BRIGHT-COLORED BERRIES: Amelanchier (Red), Berberis (Red), Cornus (White), Eleagnus (Red), Euonymus (Red), Ilex (Red), Ligustrum (Black), Lonicera (Red or Yellow), Lycium (Red), Pyrus (Red or Black), Rhamnus (Black), Rhodotypus (Black), Rosa (Red), Sambucus (Red or Black), Symphoricarpos, (White or Red), Viburnum, (Black or Red).

Spiraea Anthony Waterer

SPIRAEA (The Spiraeas). One of the most valuable classes of hardy shrubs. The best known is, of course, S. Van Houttei, which has superseded the old-fashioned Bridal Wreath in popular favor. S. Arguta is the earliest to bloom, followed by the feathery leaved S. Thunbergi. The dwarf growing S. Anthony Waterer blooms during the summer. S. opulifolia aurea is a tall rapid-growing form with yellow foliage. Each Doz. 100 form with yellow foliage. arguta (Meadowsweet) 7.50 .75 5.00 .50 6.00 .60 4.00 5.00 var. Syringa "Mad. Lemoine"

SYRINGA (The Lilacs). Unless intended for a hedge, the Lilacs should be planted far enough apart so that they can develop naturally, under which conditions they will bloom profusely from top to bottom. Especial attention should be called to the less common varieties, S. Josikaea and S. Persica. The former is late blooming, its foliage being plicated and leathery, not subject to dust and mildew as is the case with the Common Lilac. The Persian Lilac is a slender growing shrub with a tendency to droop, especially when in bloom. Amongst the named hybrids many striking colors will be found.

#### TRELLISES — SCREENS — LATTICE FENCES

Our completely equipped shop is engaged exclusively in the construction of articles of the above nature. While many of the simpler forms are carried in stock for immediate delivery, special attention is given to custom work from original designs. Let us submit sketches and estimates on any such requirements.

The Norway Spruce as a Hedge Plant

# **HEDGES AND SCREENS**

A wide range of choice in hedging materials is possible, and selections should be made with a view to the ultimate height and density desired. For low hedges, which are to be closely sheared, Barberry and Privet are the usual choice, spacing the plants one foot apart. For taller hedges and screens, the Willows, Lilacs, and evergreens of various sorts are frequently used, spacing them three to four feet apart. Many of the flowering shrubs also form most attractive hedges and borders. For a screen of extreme height and rapid growth, the Lombardy Poplar (See Page 3) is of course to be recommended.

Not less than 25 of one variety at the 100-rate; for smaller quantities see "Deciduous Shrubs" in foregoing pages.

#### PLANT WHITE PINE FOR HEDGES AND WIND-BREAKS

The value of our native White Pine for Hedges, Screens and Wind-Breaks is too often overlooked. It is a clean, hardy evergreen of quick growth, and will stand almost any amount of pruning. Young plants set one foot apart and kept trimmed will form a compact evergreen hedge. Just the thing for enclosing the clothes-yard, or for a division line between suburban estates. It makes a splendid back-ground for the perennial border. As a wind-break or screen it has no equal

SPECIAL PRICES: 18 to 24 in. at \$25 per 100; 2 to 3 ft. at \$50 per 100; 3 to 4 ft. at \$100 per 100.

# **EVERGREENS**

Nothing approaches in richness a properly arranged mass-planting of hardy evergreens. Many striking combinations of color, height and varied foliage are possible; best of all, they are as effective in winter as in summer.

We carry many other varieties that are worthy of use in this locality; but the following are what we would recommend as most reliable for general planting.

we would recommend as most renable	101 801	rerar p	, and the second

## RHODODENDRONS

#### HYBRID RHODODENDRONS

18 to	24	in.	 	 3.50 each
24 to	30	in.	 	 4.50 "
30 to	36	in.	 	 6.00 "
36 to	42	in.	 	 10.00 "

#### NATIVE RHODODENDRONS

We strongly recommend the use of our native Rhododendrons. They are hardy, free flowering, and will survive our vigorous New England winters with much less loss than hybrid sorts heretofore so largely imported. Our source of supply is such that we can fill orders for any quantity of any size in bushy, well furnished plants. Favorable quotations can be made on carload lots delivered to any point in New England.

Rhododendron Carolinianum. A native of the high altitudes of the Southern Appalachian region, and one of the finest of all broad-leaved evergreens. Of compact habit, growing from three to five feet tall, and about the same in diameter; foliage glossy, dark green, flowers pale rose to deep pink.

to see to deep pink.

2 to 2½ ft., bushy clumps... 4.00 40.00

2½ to 3 ft., bushy clumps... 5.00 50.00

Rhododendron Catawbiense. This is also a native of the Allegheny Mountains, and is extremely hardy in New England. The plant forms a compact well-shaped clump, growing from four to six feet in height. The rich green foliage and large trusses of pink to bright red flowers make it one of the most desirable broadleaved evergreens.

leaved evergreens. Each Doz.

#### RHODODENDRONS FOR NATURALIZING

For naturalizing and mass planting, collected Rhododendrons and Mountain Laurel can be supplied at reasonable rates. These plants are brought in carload lots from New Hampshire, Pennsylvania, and North Carolina. Cars can be made up of assorted sizes if desired, providing that specifications are received previous to the digging season. Orders for this class of plants should be placed at once.

## ROSES OUT-OF-DOORS

Rose-growing is becoming more and more popular with flower-lovers, especially since the introduction of the wealth of new varieties which have been developed during the last decade, suitable for out-of-door culture in our rigorous climate. The best of the new, together with many of the old favorites are included in the carefully revised lists to be found in the following pages. The varieties are grouped according to the uses for which they are best fitted. Every sunny corner of the home grounds may well be occupied by some type of rose; it will surely respond liberally to even ordinary attention.

#### **CULTURAL NOTES**

Roses grown primarily for perfection of bloom, as is usually the case, require a warm and sunny, yet well ventilated situation, with rich soil and plenty of water at regular intervals. Proximity to overhanging trees or buildings should be avoided, as well as exposure to sweeping winds. The soil is best prepared to a depth of two feet or more, placing a layer of stones and gravel at the bottom of such an excavation for drainage, then filling in successively with sods and well-rotted manure, finishing to the level of the ground with rich friable loam. Roses are gross feeders, but preparation as outlined will make for vigorous growth for several seasons.

Dormant roses should be planted early in the spring, although a few of the hardier sorts will bear fall planting. After May first, only pot-grown plants can be relied upon for thrifty growth; they have an active, well-established root-system and may

be set out in the open ground at any time during the summer.

#### GARDEN ROSES

The Roses suitable for cut-flower purposes are grouped under this head. They include most of the hybrids best adapted to garden culture. Abbreviations: A. B., Austrian Brier; B., Bourbon; H.P., Hybrid Perpetual; H.T., Hybrid Tea; M., Moss; T., Tea.

#### POTTED PLANTS

After May 1st., the following varieties can be supplied from 5 and 6 inch pots and in a thrifty growing condition when delivered. Any varieties which can be supplied in a dormant Per 100 state are listed under "Dormant Plants. Each Doz. Alfred Colomb (H.P.) Cherry-crimson American Beauty (H.P.) #### ROSES FOR MASSING

These "natural" or "wild" types, and the hybrids derived from them, are hardy, shrubby roses suitable for massing or hedging. The hybrids retain the vigor and hardiness of the parent species, with refinement of color and blooming qualities.

Rosa Hugonis

HUGONIS A new bush rose from China, reaching a height of 6 feet. Its arching branches, in early May, are lined throughout their length with pale yellow, single flowers the size of a silver dollar. Hardy everywhere. Pot plants \$2.00 each, \$20.00 per dozen.

Rose Gardens We design and plant Rose Gardens to correspond with any desired location. Ask our Landscape Department for plans and estimates.

Canterbury Bells and Foxgloves

# Hardy Herbaceous Perennials

The perennials supply us with some of the most beautiful and interesting plants available for outof-door culture. By judicious selection a succession of bloom from spring until frost, with wonderful range of color, may be obtained. Time of flowering and approximate height of each is indicated.

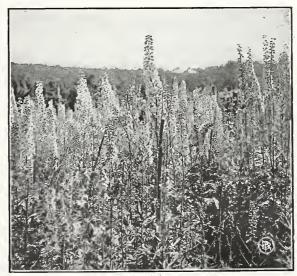

Not less than 6 of one variety at the dozen rate; not less than 25 of one variety at the 100-rate

## FLOWER GARDENS

The well-planned flower garden or border can be made a source of enjoyment from early spring until late fall, as the succession of bloom affords some new beauty from day to day. Complete plans and estimates are supplied by our Landscape Department at reasonable cost.

## German Iris

GERMAN IRIS. The German Iris is among the most desirable and easiest grown of our Spring-flowering hardy plants, producing in May showy flowers of exquisite coloring, combining the richest and most delicate tints. For best results plant in a well-drained, sunny position, barely covering the roots. In the following descriptions, "S" signifies the standards, or erect petals, "F" the falls, or drooping petals.

Alcazar. S., light-bluish violet. F., deep		Per Doz.

# LEXINGTON-GROWN GLADIOLI

Among the annual and bulbous plants valuable for garden culture, the Gladiolus is becoming increasingly popular. It is useful for bordering and massing and blooms late in the season when bright flowers are becoming scarce; for cut flower purposes it is unsurpassed. The simplicity of its cultural requirements being not its least important qualification.

We wish to renew our invitation to our friends to visit our grounds during the blooming season in August and September, and enjoy the expanse and variety of bloom that only an immense planting makes possible. Upon request, we will send notice of the period of best bloom.

#### **CULTURAL DIRECTIONS**

Gladioli require much the same soil conditions as do potatoes, rich, yet porous soils giving best results. Stable manure may be used for fertilizer; but commercial phosphate, sheep manure, or a mixture of ground bone and wood-ashes is good, the last-named being especially valuable.

Bulbs may be planted as early as the ground has dried out in spring, and plantings may continue at intervals until early July if succession of bloom is sought. Time of bloom varies from sixty-five to ninety days after planting. Set the bulbs right-side up, five or six inches deep and three to six inches apart, selecting a situation where sunlight and moisture will be plentiful. Frequent cultivation should be given during the growing season.

In the Fall, after the leaves turn brown, the bulbs should be lifted and the stalks cut off, after which they should be stored in a cool place where frost will not reach them. When they have dried, the adhering fibrous roots and shriveled "spent" corm should be torn off.

Bulbs at the single or dozen rate sent postpaid to any address.

#### NEW GLADIOLI FOR 1922

#### Varieties of More Than Usual Merit

When we offer new varieties of Gladioli, it is with the sincere endeavor to distribute something that possesses distinction in both appearance and quality; something clearly different from any other. The following were in the collection that won the Massachusetts Horticultural Society's Gold Medal at the great show in Boston in the Summer of 1921.

# PRIMULINUS HYBRID GLADIOLI

This new and beautiful race of Gladiolus has been produced by using the fine yellow species "Primulinus", or "Maid of the Mist", in crossing with the older existing strains. The hybrids resulting are distinguished mainly for their fine and varying shades of yellow, graceful slender stems, and airily poised and hooded flowers.

Every variety we offer is the product of the master hybridizer, Kunderd. Every variety is an Exhibition variety; not a disappointing flower in the lot.

## **DAHLIAS**

These old-fashioned flowers have always been in favor on account of their bright colors, and their freedom of bloom under unfavorable conditions. Late developments have added such beauty and gracefulness that they are more than worthy of the increasing interest in their cultivation which is now apparent. Their extreme variation in form and color has resulted in an almost endless assortment of named Dahlias; but careful selection reduces to a comparatively small number the sorts that are of recognized value for garden cultivation, and it is of such sorts that our collection is comprised. Type of flower is indicated after name of each.

Not less than six of one variety at the dozen rate.

Queen Wilhelmina - Peony-flowered

#### DAHLIA DOZENS

No. 1. Cactus Dahlias. An assortment of 12 named varieties, all different, each one labeled, for \$2.00.

No. 2. **Decorative and Peony-Flowered.** 12 Named varieties, our selection, for \$2.50.

No. 3. Single and Collarette Dahlias. Two each of six named varieties, our selection, for \$2.00.

No. 4. Pompon and Show Dahlias. One dozen named varieties, each root labeled, our selection, for \$1.75.

Popular Mixture. Every season mixtures occur in handling our stock of Dahlias. All are high-class varieties, frequently worth 50 cents per root. This mixture we offer, packed one dozen in a box, at the low price of \$1.50 per box.

Field of Cannas at Lexington, 1921

## FLOWERING CANNAS

Our collection, the most complete in New England, comprises many of Wintzer's greatest creations in giant orchid-flowered Cannas, all of which have won the highest awards at the world's most notable exhibitions. These new and improved forms of Cannas must be seen to be appreciated. Their brilliancy of color, perfect flower-spikes, and free blooming qualities combine to make them the most popular of flowering plants for lawn decoration. Our Canna fields, when in bloom, alway attract much favorable comment.

Cannas thrive in any good garden soil, made rich with well-rotted stable dressing. Best results are obtained by starting the roots in-doors in pots during March or April, the plants being set out after the weather is settled and the ground warm, usually in May or June. For bedding, the plants are usually set 18 inches apart. We do not furnish dormant roots after April 1st, but have a full stock of growing plants in pots ready for setting as soon as weather conditions are favorable. By setting these potgrown plants, one secures a much longer flowering period than when dormant roots are planted. Cannas continue to bloom freely until the frost cuts them down in the late autumn, after which the roots should be lifted and stored in a dry place free from frost.

#### PLANTING SUGGESTIONS

CANNAS may be used in small groups in the flower or shrub border; but the usual arrangement is in the form of round or oval beds, massing the plants, one or more colors symmetrically arranged, with a border of Coleus, Salvia, Varigated Geranium, or some similar plant. In very large beds, a central group of Caladium (Elephant's Ear) or Castor Bean is frequently made use of. It is also advisable, when the bed is large enough to warrant, to select a tall-growing variety of Canna for the center, surrounding this with a lower-growing sort of some harmonizing color.

sort of some harmonizing color.

The Cannas should be spaced 15 to 18 inches apart, while the border plants, being smaller, should be spaced 12 inches apart. It is well to mound up the soil in the bed so that the center is higher than the edges. The soil should be rich and well pulverized; the plants should be given plentiful watering after planting, and at frequent intervals during dry periods.

#### Quantities of Cannas for Round Beds

### VISIT OUR NURSERIES

During midsummer and early autumn, many interesting and attractive features in and about our grounds may be found at their best. The Cannas, Dahlias and Gladioli, as well as the Roses and perennial flowers, provide a continuous profusion of bloom until heavy frosts destroy them.

## SUMMER BEDDING PLANTS

Pot-grown, for planting about May 1st.

## FRUIT TREES AND SMALL FRUITS

Grown in New England; well rooted, clean and thrifty

#### APPLES

The following list of apples embraces varieties which have been tested, and can be recommended as the very best for general cultivation. All apples are furnished in standard sizes unless dwarf trees are specified.

Prices: 2-year, 5 to 7 ft., \$1.50 each; \$15.00 per doz. except as otherwise noted. Extra size, 3 and 4-year trees, \$2.00 to \$3.00 each.

Dwarf Trees on Paradise stock, 2 to 3 ft., \$1.25 each; \$12 per doz. These are useful for small gardens, and usually bear the third year after planting. Offered in the following varieties: Baldwin, Duchess, Ea. Williams, Gravenstein, Hubbardston, McIntosh, Red Astrachan, Wealthy, Yellow Transparent.

#### Summer

Early Harvest. Pale yellow, excellent, early. Colden Sweet. Large, pale yellow, sweet. Large, crimson, very early. Williams. Dark red, mild flavor.

Alexander. Very large, red striped. Duchess of Oldenburg. Yellow, streaked with red, juicy and good.

Fameuse (Snow Apple). Crimson, flesh white, excellent. Gravenstein. Large yellow, striped red. Maiden's Blush. Sept.; large, yellow and red; good.

Pippin. Fall, yellowish green, very fine. Porter. Medium, bright yellow; good.

Pound Sweet. Nov.; very large, yellowish, sweet and rich.

Baldwin. Large, dark red, productive, medium. Delicious. All that its name implies. Striped with red.

Gano. Bright red.

Golden Russet. Late yellow, good flavor. Hubbardston. Large yellow, splashed red; early. Jonathan. Yellow, striped red.

Hendrick's Sweet. Red, splashed crimson.

King. Large red. McIntosh Red. Vigorous growth; handsome, hardy. Ripening November to February. 2-year, \$2.00 each, \$20.00 per doz.

Northern Spy. Large, striped red, good keeper. Opalescent. Dark crimson.

Rhode Island Greening. Large, yellowish green, medium. Roxbury Russet. Extra quality. Largest of russets. Spitzenburg. Brilliant red.

Tolman's Sweet. Medium, light yellow, excellent.

Wagner. Red, early bearer.
Wealthy. Dec. to Feb.; dark red, juicy, good, very hardy.
Winter Banana. Large. Pale yellow with pinkish bloom.

#### CRAB APPLES

Price: \$1.50 each; \$15 per doz.

Hyslop. October to January; deep crimson.

Martha. Fruit glossy yellow, shaded with light red.

Transcendant. September, October; useful alike for preserving, pies, sauces and cider.

Whitney. Very large red; good bearer.

#### **PEARS**

Standard Pears. 5 to 7 ft., \$1.50 each; \$15.00 per doz.; except where noted.

Dwarf Pears. Budded on quince stocks, in the following varieties; 3 to 4 ft., \$1.00 each; \$10.00 per doz. Bartlett, Beurre d'Anjou, Clapp's Favorite, Duchess d'Angouleme, Howell, Lawrence, Seckel, Wilder's Early.

#### Summer Pears

Bartlett. Vigorous growth; large; yellow and red; juicy. Ripening September,

Clapp's Favorite. Vigorous growth, very large and hand-some; yellow and crimson. Ripening August.

Wilder. Ripens in August and is a liberal cropper. Skin bright yellow; flesh rich creamy color and virtually core-

#### Autumn Pears

Buerre Bosc. Moderate growth; large russety; buttery, rich. Ripening September and October. \$2.00 each.

Flemish Beauty. Vigorous growth; large; yellow and russet; juicy, melting, sweet; good; very hardy. Ripening September and October.

Louise Bonne of Jersey. Vigorous growth; large; yellow and red; melting, buttery, rich; Sept. and October.

Seckel. Moderate growth; medium; brown; juicy, melting and buttery; of the highest flavor. Sept. and Oct.

Sheldon. Vigorous growth; large; russet and red; melting, rich, delicious, very good. Ripening October.

Vermont Beauty. Brilliant-colored skin. Matures a little later than the Seckel and is valuable as a shipping pear.

#### Winter Pears

Buerre d'Anjou. Vigorous growth; very large; greenish yellow; melting, buttery, juicy, sprightly, vinous; keeps into mid-winter. Ripen, November and December.

Lawrence. Moderate growth; medium to large; golden yellow; melting, aromatic, very good. November and December.

Fitzgerald Peach

#### CHERRIES

Price: 6 to 7 ft., \$1.75 each.

Black Tartarian. June; large, purplish black; sweet. Early Richmond. June; best early, sour. English Morello. July; large dark red, sour. Montmorency. July; large, tender, rich; sour.

Napoleon. July; pale yellow and red; sweet.

Rockport. July; amberandred; sweet.

Schmidt's Bigarreau. July; large, deep mahogany; sweet. Yellow Spanish. Late June; pale yellow, red cheek.

#### **PLUMS**

Price: 5 to 7 ft., \$1.75 each. Extra size \$2.00 each.

#### European Type

Bradshaw. August; large, purple, sweet.

Damson. September; dark purple, very productive. Lombard. September; medium, violet, red, juicy.

Reine Claude. Sept.; large, greenish yellow, very fine.

Yellow Egg. August; large, yellow.

#### Japanese Type

Abundance. Early, fruit amber turning to cherry, flesh yellow, juicy, tender and sweet. Bears heavily.

Burbank. Sept.; bright red, flesh yellow and sweet.

October Purple. September; large, dark purple; yellow flesh.

Red June. September first; medium, purplish red.

Satsuma. September; purplish-red, flesh dark red, juicy. Wickson. Late, large, carmine, delicious, small stone.

#### PEACHES

Prices: 5 to 6 ft., \$1.00 each; \$10.00 per doz. Carman. August. Pale yellow skin and red cheek. Champion. Aug.; new, creamy white; large; superior. Crawford's Early. September; large, yellow, freestone. Crawford's Late. Very large, juicy, good, freestone. Crosby (Ironclad). September; medium, sweet, firm. Elberta. August first; flesh yellow. Very juicy. Fitzgerald. September; large, Crawford type; hardy. Foster. September; similar to early Crawford; better. Greensboro. Large, white flesh; freestone; August 1st. J. H. Hale. New; large yellow; September. Mountain Rose. September; large white and red, melting. Niagara. New; pale yellow; late August. Old Mixon. September; large, white and red, juicy and rich.

#### **QUINCES**

4 to 5 ft., \$1.50 each.

Apple or Orange. Large, roundish, bright golden yellow; very productive.

Champion. Vigorous and productive; very late. Meeches Prolific. Large; early and of high quality. Rea's Mammoth. A seedling of orange, but larger.

#### HARDY NATIVE GRAPES

Strong 2-year vines, 6oc. each; \$6 per doz.; \$40 per 100.

#### Blue-Black

Concord. Bunch and berries large, round, black.

Moore's Early. Early black grape.

Worden. Berries large, sweet. Ten days earlier than Concord.

#### Red and Reddish Purple

Agawam (Roger's No. 15). Large, tender, juicy, vinous Brighton. Large, of the best quality, and ripens early. Delaware. Medium or small, highly esteemed.

Salem (Roger's No. 53). One of the best and most popular.

#### White

Moore's Diamond. Berry about the size of Concord; color greenish white with yellow tinge; juicy.

Niagara. Berry large, slightly pulpy, tender, sweet, ripens with Concord.

#### RASPBERRIES

\$1.25 per doz.; \$6.00 per 100, except as noted.

Columbian. Very large, purple. Rich flavor. Cumberland. One of the finest black, large and productive.

Cuthbert. Red, firm and superior quality.

ine Park. This new "Everbearing" red raspberry originated on a private estate at Lee, Mass., and is described Erskine Park. by the U. S. Dept. of Agriculture as surpassing all other late-bearing sorts. The plants are very hardy; fruit large and firm. \$1.50 per doz.; \$10 per 100; \$80 per 1000.

Golden Queen. Productive and of superior quality. Golden yellow.

Gregg. Good black, productive and hardy.

June. Red; two weeks earlier than Cuthbert. \$1.50 per doz.; \$8 per 100.

La France. A superior new giant ever-bearing variety. Large juicy red fruit. Heavy bearer, very hardy. \$6 per dozen

Marlboro. Large, red, very productive.

Plum Farmer. Large, black; vigorous grower. St. Regis. The everbearing red, good quality. \$1.50 per

doz.; \$8 per 100.

Moore's Early Grape

Cherry Currant

#### CURRANTS

25c. each; \$2.50 per doz.; \$20 per 100, except as noted.

Cherry. Large, red, juicy.
Fay's Prolific. The most popular red variety for home use, bears heavily.

Perfection. The largest red currant in existence; a prize winner. 35c. each; \$3.50 per doz.

#### BLACKBERRIES

\$1.25 per doz.; \$6 per 100

Agawam. The earliest; flavor like the wild berry.

Eldorado. Hardy, good size and quality, unusually productive.

Erie. Large and early; excellent quality.

Rathbun. Extra large, productive, new.

Snyder. Best quality, very sweet, medium size.

Wachusett Thornless. Fruit medium, hardy and very pro-

ductive, almost free from thorns.

#### GOOSEBERRIES

5oc. each; \$5 per doz.

Red Jacket. The best red, free from mildew.

Pearl. The most prolific, free from mildew, green.

Downing. Whitish Green.

#### **DEWBERRIES**

Lucretia. The creeping blackberry, with large, black luscious fruit. \$1.50 per doz.

Agawam Blackberry

#### STRAWBERRIES

For best growth, Strawberries require light fibrous or sandy loam, well enriched, with plentiful moisture during the bearing season. The plants should be set 12 to 15 inches apart, in rows 2½ to 3 feet apart. They should be kept free from weeds, and mulched with straw or litter in winter. Fruit is borne the year after planting.

Varieties here listed are Perfect Flowered, except Sample. which must have a P. F. variety planted near it for fertilization. Layer Plants. For spring planting. 50c. per doz.; \$2 per

100; \$18 per 1000; except Marshall

Pot Grown Plants. For July, August and September planting. \$1 per doz.; \$5 per 100; \$45 per 1000.

Abington. Large fruit, solid, and excellent flavor. P. F. Big Joe. Brings highest price of any berry on the New York market. Large, productive, midseason. P. F.

Breck's Abundance. Large, excellent berry; very heavy cropper; flavor tart; medium early. Highly recommended.

Brandywine. Hardy, good quality. Medium. P. F. Early Ozark. P. F. Extra early; large, dark red, delicious

Gandy. Large berries; late and an excellent cropper. Splendid keeper. P. F.

Glen Mary. Large, crimson berry; good quality, very productive; late. P. F

Klondike. Size, medium to large, firm and a good shipper. Medium early. P. F.

Marshall. Requires no recommendation; is medium late. The fruit is very large, deep crimson color, and extra quality. P. F. \$3 per 100; \$25 per 1000.

Parson's Beauty. P. F. Mid-season; very heavy yielder, marketing well.

Sample. Medium late. An extra good commercial variety. Imp. Success. All that its name implies. Large, early. P. F. Uncle Jim. Large, regular in form, medium late. P. F.

William Belt. Fruit large and somewhat irregular; of high quality and a good bearer. Late. P. F.

#### Fall or Everbearing Strawberries

Runner plants, for spring planting, 50c. per doz.; \$4 per 100. Potted Plants, for mid summer planting, \$1 per doz.; \$6 per

**Progressive.** This variety makes a vigorous growth, and produces immense quantities of berries. Blossoms should be kept picked off until about the middle of July. If this is done, a heavy crop is insured from about the first of August until heavy frost. The berries are of medium size and excellent quality.

Superb. The berries of this excellent variety are a little later than those of Progressive. The plants are about equal in vigor of growth, but do not produce so many berries per

plant as Progressive.

## Gardening Sundries and Supplies

This abridged list of materials will be found to contain the necessities usually required during the season by the amateur gardener. Having made use of them in our nursery for several years, we can safely recommend these articles to our customers. All prices are f. o. b. Lexington or Boston.

#### LAWN GRASS SEED

Breck's Standard Lawn Grass. This is a carefully prepared mixture for permanent lawns containing a variety of hardy grasses so blended that a close-textured turf of deep green color is produced.

One quart 300 sq. ft..... Two quarts 600 sq. ft.
Half peck 1200 sq. ft. 2400 sq. ft..... One peck 2.25 One bushel 10000 sq. ft..... Four bushels will sow one acre.

Breck's Boston Park Lawn Grass. A heavy mixture of fancy recleaned seed, rich in clover, meeting specifications of the Boston Park Commissioners. Unsurpassed for use in seeding a new lawn, and especially valuable for "patching" bare spots.

600 sq. ft..... \$0.60 One pound One peck (8 lbs.) 5000 sq. ft.... One bushel (32 lbs.) 20000 sq. ft.... Two bushels will sow one acre

Breck's Shady Spot Lawn Grass. A mixture of grasses that will grow under trees or in the shade of buildings.

One quart 250 sq. ft......\$0.40 Half peck 1000 sq. ft..... One peck 2000 sq. ft..... 2.25 One bushel 8000 sq. ft.....

Breck's Bank and Terrace Grass Mixture. This mixture contains deep-rooting or stoloniferous varieties which, when once established, will prevent washing and preserve a thick turf.

> 200 sq. ft.... One quart Half peck One peck 2.50 One bushel 8000 sq. ft.....

> > **FERTILIZERS**

Pulverized Sheep Manure. Breck's "Ram's Head Brand" sheep manure is a full-strength fertilizer, free from weedseeds, convenient to apply, especially valuable for lawn dressing or general purposes. Three applications a season at the rate of 100 lbs. to 1000 square feet, or 1200 to 1500 lbs. per acre.

One ton . . \$56.00 10 lbs.... .35

Fine Ground Fertilizer Bone. An all-round fertilizer for all crops, but especially for grass or fruit-trees. Often mixed with sheep manure for lawn dressing.

One ton . . \$60.00 100 lb. bags.....\$3.50 Less than 100 lb. bags, per lb.....10 10 lbs.... .45

Inch or Grape Bone. Coarse, broken bone, the standard fertilizer for grape vines and fruit trees.

100 lb. bags. .\$4.00 One ton..\$65.00 10 lbs.... \$0.50 Breck's Extra Market Garden Manure (4-8-6). A properly balanced complete chemical fertilizer for all farm or

garden crops. 50 lb. bag. .\$2.00 100 lb. bag. .\$3.50 One ton . . \$65.00

Breck's Lawn and Garden Dressing. A carefully compounded chemical fertilizer, for use primarily as a lawn dressing, but suitable for general purposes. May be applied in moderate amounts at any time during the season. 50 lb. bags (5000 sq. ft.) \$2.75 100 lb. bags (12000 sq. ft.) 5.00

Land Lime (Rockland-Rockport). Lime is used for neutralizing acid or "sour" conditions in the soil, also to aid in the decomposition of organic materials that may be used as fertilizers. Frequently used in combination with sheep manure or ground bone for lawn dressing, when soil conditions warrant.

50 lb. bags. .\$0.75 100 lb. bags. . \$1.25 Per ton. \$16.00

#### INSECTICIDES

Corona Dry Arsenate of Lead. This we have found to be the most convenient and economical form in which to use the well-known Lead Arsenate. There is no loss from evaporation, and it mixes readily with water in any proportion. An "over-dose" does no injury to the foliage. Useful for fruit-trees, potatoes, etc., killing all insects that eat the leaves. One pound will make from 20 to 25 gallons of solution.

One pound packages . . . . . . . . . . . . . . . . . . \$0.40 Five pound packages..... 1.75 25 pound drums.....

Corona Dry Bordeaux Mixture. The standard remedy for fungous plant diseases; may be used dry for dusting, or in solution for spraying. One pound is sufficient for five gallons of solution.

One pound packages..\$0.35 Five pound packages..\$1.50 Black Leaf 40. All sucking insects, of which common plant lice are the most common, require a "contact" spray for their extermination. We have found "Black Leaf 40" uniformly effective for indoor or outdoor use. A concentrated solution of nicotine sulphate. One ounce will make six to eight gallons of spray.

One ounce bottle..... \$0.35 Half pound can..... 1.25 Two pound can.....

#### STERLINGWORTH WEED KILLER

Sterlingworth Weed Killer. A powerful and effective weedkilling compound for destroying weeds, grass, poison ivy, or other objectional vegetation in walks, driveways, tenniscourts, etc. Dissolve the powdered compound in water and apply with a sprinkling can.

One pound package (makes 10 gallons). \$0.50 Five pound package (makes 50 gallons)...

#### TOMATO SUPPORTS

Wood and Wire Tomato Supports. Three hardwood stakes with wire hoops, folding flat when not in use. Frequently used for peonies or other plants requiring support. Each . . . . . . . . . \$0.35 Per dozen . . . . . \$3.50

#### PLANT STAKES AND LABELS

Plant Stakes, square, painted green, tapered and pointed.

2 feet \$0.50 per doz. \$3.50 per 100 3 feet 1.00 per doz. 7.00 per 100 4 feet 1.60 per doz. 11.00 per 100 6 feet 2.75 per doz. 18.00 per 100

Dahlia Stakes, same as above, extra heavy, tarred points. \$18.00 per 100

4 feet \$2.75 per doz. 6 feet 4.00 per doz. 28.00 per 100

Garden Labels. Extra heavy, painted white one side, for marking vegetables or flowers.

12 inches long, 11/4 inch wide, 3/8 inch thick 35c per doz.; \$2.50 per 100 16 inches long, 11/2 inch wide, 1/2 inch thick

50c per doz.; \$3.50 per 100 Embossed Metal Labels. Made from zinc or aluminum, for the permanent marking of fruit trees, grapes, roses, or flowers. These labels are made to order and are supplied with brass wires, or attached to painted stakes, according to the purpose for which they are to be used. Names requiring more than twenty letters are supplied at slight additional cost.

Price plain, 10c each \$5.00 per 100 Price wired, 12c each \$6.00 per 100 Price on stakes, 20c each \$12.00 per 100

Roffea. For tying plants, roses, grape vines, etc. Per 1b., 25c 10 lbs., \$2.00.

One of many styles suitable for the country estate or golf course.

The Bridge illustrated is located in "Bloemgaard," our Dutch flower-garden at Lexington. Here and about our grounds may be found many examples of Garden Furniture in both wood and stone.

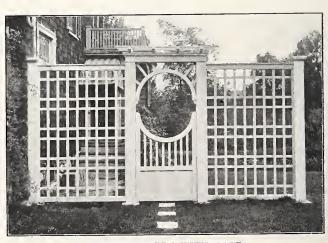

GARDEN SEAT
Length 5 ft. Price \$30.00

## Fences and Screens

A well-designed fence or screen, preferably covered with vines, is the ideal solution of the service entrance or laundry-yard problem. The lattice screen illustrated is one of the simple designs which meet with the greatest favor, and can be supplied, set up and painted, for approximately \$100.00. With this class of work, we make special effort to make each structure distinctive, and completely in harmony with its surroundings. Sketches and estimates are gladly furnished.

## Materials and Workmanship

In the manufacture of our Garden Furniture we make use of only the best materials obtainable, and the workmanship is equal to that found in the finest indoor furnishings. White Pine and Cypress have proved themselves the most lasting when exposed to weather and moisture; the methods of construction employed are calculated to best withstand these conditions. All our work is finished with the best lead and oil paints, three coats being applied. When practical, the final coat is applied after the piece has been set up in its permanent location. We prefer to set up the larger pieces with our own men; but it sometimes is possible to supply the structure "knocked down," to be set up by a local carpenter or contractor. Unless otherwise specified, all supporting posts are set in cement with a view to stability and permanency.
